

DENTAL CARE

An enzymatic toothpaste for cats and dogs

Dental Care contains an enzymatic complex designed to inhibit the formation of plaque and ensure that tartar and plaque cannot build up on teeth. The bio adhesive system means no brushing is required.

Composition

Enzyme complex: Lactoferrin, Lactoperoxidase, Lysozyme, Potassium Thiocyanate

Glucose Oxidase, Sorbitol, Glycerine, Silicon Dioxide, Silica, Carboxymethylcellulose, Polyethylene Glycol, Sodium Benzoate, Zinc Gluconate, Dextrose Anhydrous, Titanium Dioxide, Purified Water, Potassium Sorbate, Poultry Flavouring

Specification

PASTE 

FLAVOUR: 
POULTRY

SPECIES:  

SIZE: **100g**

Directions for use

Can be given daily from 6 months of age. The bio adhesive system means this can be used with or without brushing. If not using a brush, simply rub the paste between the gum and the cheek on each side of the mouth.

Cats and Small Dogs <10kg - 1 pea sized drop

Dogs 10-20kg - 2 pea sized drops

Dogs >20kg - 5 pea sized drops

If necessary the teeth should first be professionally scaled and polished.

Key Ingredients

ENZYME COMPLEX

Prevents dental plaque forming on the teeth .
