

FIBRE CARE

Supporting normal digestion in cats and dogs

Fibre Care contains soluble and insoluble fibre, probiotics, prebiotics and bentonite clay. Providing enough fibre in a pet's diet helps support normal digestive function, balance levels of water in the intestines and firms up faecal matter. Adequate fibre can also reduce the need for anal gland emptying as it increases natural expression.

Composition

Wheat Feed
Alfalfa Meal
Beet Pulp
Wheat Bran
Flaxseed
Chicory Root Powder
Enterococcus Faecium
Bentonite

Specification

POWDER  SCOOP INCLUDED

SPECIES:  

SIZE: **500g**
